Plessey iSDX-S

The advanced business communications system for the smaller organisation

- Advanced technology
- 50-300 extensions
- British design and manufacture
- Remote maintenance capability
- Integrated voice and data
- System X compatibility

The Plessey ISDX-S enables the benefits of the powerful ISDX system to be made available to the smaller organisation and business. With a range of 50 to 300 lines it complements the full ISDX range.

Though small in size and range the ISDX-S provides all the features and facilities of the IDX. The integration of voice, text and data enables the ISDX-S to support a wide range of peripherals and stand at the heart of the electronic office of the 1980's.

Plessey ISDX-S is British designed and made, and it's available now, direct from the manufacturers.

The benefits start with more versatile telephones

You'll find the telephone on your desk easier to use, and much more flexible and accommodating when handling internal and external calls.

That's because Plessey ISDX-S incorporates a host of time-saving, cost-cutting features that allow the user to by-pass the operator when dialling out; achieve rapid transfer between extensions; enjoy 'follow-me' features which direct calls to any office in the building; and provide full secretarial and abbreviated dialling facilities and much more.

There are more than a hundred easy-to-use features like these, all designed to cut out time wastage, reduce costs, and free your staff to do other work.

Plessey ISDX-S makes the telephone more efficient and versatile than previously thought possible with plug-in and key-and-lamp exchanges.

Plessey Support

Plessey offer a comprehensive maintenance service for your ISDX-S. This is provided by a nationwide network of service centres and specialist engineers are helped by remote diagnostic facilities which monitor ISDX exchanges anywhere in the country. Plessey training schemes ensure that your staff will derive maximum benefit from the Plessey ISDX-S and further consultation is always available for system expansion.

Physical size

Height 1233mm
Depth 437mm
Width 635mm

Range *Typical*	*Traffic*
304 extns. 32 trunks	220 erlangs
240 extns. 48 trunks	0.18 erlang per extn.
156 trunk tandem	0.8 erlang per trunk

Power

Mains operated: 1200watts maximum
