

# Superset 4025 - Enhanced Digital Display Telephone

The multi-line SUPERSET 4025 is the ideal solution for professional and management staff, and call centre agents requiring enhanced access to PBX system features and options.

## Highlights

- Multi-line telephone

- 20-character illuminated display screen

- 3 softkeys

- Half Duplex hands-free

- 14 Personal Keys

- Dedicated headset interface jack

- Built-in tilting stand

- Compliant with FCC volume control and hearing aid compatibility rules

Available in Light Grey, Charcoal Grey, or Emergency red.

## Superset 4025 Features

### Visual Interface

The SUPERSET 4025 features an easy-to-read 2\*20-character illuminated display screen that provides users with a range of visual information, including calling line ID, call status, time and date, and messaging. In conjunction with the display, three softkeys provide context-sensitive prompts that ensure the user has easy and immediate access to system features relevant to the situation - reducing user uncertainty and error when handling a call. The SUPERSET 4025 also features a large message waiting lamp, plus red LED indicators on Personal Keys and the Microphone Key to indicate status.

### SuperKey Access to Programming

The SuperKey and interactive display on the SUPERSET 4025 provide an intuitive way to program the telephone's fourteen Personal Keys for feature access or speed calls. Users simply toggle through a displayed menu of functions, selecting those they wish to program or adjust. When associated with the display and the telephone's three softkeys just below the display screen, the SuperKey provides access to special telephone features.

### Programmable Personal Keys

The telephone's fourteen Personal Keys can be programmed for system feature access, speed calling, or as line appearance keys.

### Hands-free Operation/Off-Hook Voice Announce

The SUPERSET 4025 supports hands-free operation with a Speaker Key for turning the telephone's built-in speaker on and off, and a Microphone Key that allows the microphone to be turned off for privacy during an on-hook call. Depending on system availability, the SUPERSET 4025 will also support off-hook voice announce, enabling attendants/secretaries to inform those on the line of an important incoming call.

### **Simplified Feature Access**

The SUPERSET 4025 provides simple access to a range of features, including:

- Sending and receiving messages
- Last number redial
- Transferring calls
- Setting up conference calls
- Canceling call features in progress
- Placing and retrieving calls on hold
- Adjusting volume of receiver and volume and pitch of ringer
- Adjusting display screen contrast

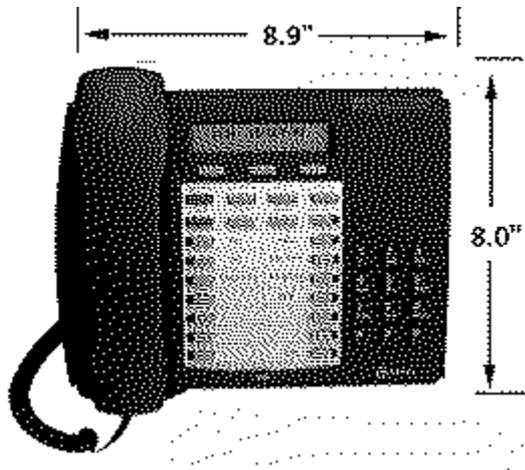

### **Sleek Design**

The SUPERSET 4025 features the sleek SUPERSET 4000 Series design. Its dedicated headset interface jack eliminates the need for a headset amplifier box and is ideal for call centre applications. Available in dark charcoal gray, light dove gray and 'Emergency Red', the telephone has a built-in tilting stand to provide multiple desk positions, and can also be wall mounted.

### **Context-Sensitive Display**

Prompts associated with the three softkeys reduce user uncertainty by indicating the correct procedures.

### **Specifications**

Width: 226.5 mm (8.9 in.)

Height: 204.1 mm (8.0 in.)

Storage temp. range: -25°C to +70°C (-13°F to +158°F)
